

Assembling Your Technotrash Can

Use the plastic bag used to ship your Technotrash Can to line the interior of the Technotrash Can or to keep items from moving when you return it and we'll recycle the bag.

Step 1. With the Technotrash Can upside down, fold back the largest flap. Then fold over the side flaps and tuck under the first flap.

Step 2. Fold the last flap forward and tuck under the first flap to close the bottom.

Step 3. Turn the box right side up. Take one side flap (without writing) and fold and tear off along the top perforation. Bend flap along the diagonal seam. Repeat process on other side. Place the two detached pieces in the box to reinforce the bottom.

Step 4. Fold the flap that says "Technotrash Can" along the double perforation as shown above.

Your GreenDisk Technotrash Cans

(as they should look when completed)

Step 5. Fold the remaining flap back. Bend the tab back at the perforation and tuck in. Lastly, push in the perforated **HERE** opening. You are ready to recycle!

For instructions on returning your Technotrash Can visit www.greendisk.com and go to the 'Pickup' page for your FedEx label or call 800-305-3475 for assistance.
